## Catch Platform for greater than 26°

**The Risk**

**Inherent Risk Score: High**

**Death or Injury** resulting from a **Fall from Heights.**

# Safety Alert

## What needs to be done?

### Hudson Homes Supervisors

- Check that rail spacing is always less than 225mm.
- Check that the catch rail extends at least 900mm from the projected roof line.

Contact Buildsafe if minimum requirements have not been met and close the Hang-on Walkway System.
